RECRUITING *with* PURPOSE

1 BAD HIRE CAN BE DETRIMENTAL TO A STARTUP

You can't afford to get it wrong. That's why we get it right. We integrate ourselves with your team to understand your culture, values, and must-haves for the role. Each candidate is thoroughly screened to judge their fit with your culture and the position needs.

RECRUITING IS NOT ONE-SIZE-FITS-ALL

A venture-backed fintech startup has different needs than a bootstrapped gaming startup. We offer the service of a large corporation with the flexible agility of a small company. Our delivery is customized to each client, from interview questions to agreement terms, based on what makes sense for your business.

DAY 1 LOOKS DIFFERENT THAN DAY 451

Success as a startup means being adaptable. Your needs change with each passing day and you need a partner that can keep up. We act as recruiting consultants from day 1 and scale with you as your business grows. Your success is our success, whether we are searching for a help desk analyst or a CTO.
