

Accounting and tax priced to scale as your startup grows

We combine the expertise and hands-on service of a small CPA firm with the agility of a tech company and the on-demand insights of automated software, helping you grow your business from pre-revenue to exit.

With all plans, we handle the accounting and tax compliance through a combination of easy-to-use and scalable software, a dedicated finance team, and tax expertise. We structure your plan specifically so you never overpay for accounting or tax services or expertise you don't need, but they are always there for you to access when the time comes.

The Basics

For businesses just getting off the ground, we have you covered with straight-forward, cash-based accounting.
